## TOWER MOD. 360

REF. 3088 / 3089 / 3058 / 3085 / 3086 / 3087 / 308601 / 308701 / 308702 / 308501

## A PERSONALIZED TOWER

Televes launches the renovated Tower Mod. 360, based on a new concept of design and manufacturing, which results in a considerable improvement in its torsional rigidity and reduction of the weight of its sections.

All the effort in engineering provides the installer a bigger ease of handling and assembly, as well as a greater resistance of the tower at different heights, thanks to the new distribution of its lattice.

- Change of the lattice's structure which increases strength and torsional stiffness, lightening the weight of the sections.
- **New detachable racord** that allows a better protection of the section against rusting, thus increasing the durability of the tower.
- Made of steel with shiny zinc and bi-chrome coating and RPR.
- New fitting system that facilitates the insertion between sections.
- New metric of fine pitch.

REF.	DESCRIPTION	WEIGHT	EAN 13
3088	Pivoting base embedded 360	3,76 kg	8424450136669
3089	360 self-supporting embedded base	3,16 kg	8424450136676
3058	Guy wire ring 360	0,60 kg	8424450030585
<b>360 RPR</b>			
3085	Upper section 360	23,4 kg	8424450136652
3086	Lower section 360	22,7 kg	8424450136683
3087	Middle section 360	24,3 kg	8424450136690
<b>360 COLOUR</b>			
308601	Lower section 360 red	22,7 kg	8424450136713
308701	Middle section 360 red	24,3 kg	8424450136720
308702	Middle section 360 white	24,3 kg	8424450136737
308501	Upper section 360 red	23,4 kg	8424450136706
