

Calibration of Spectrum Analyzer, Certificate Included

This service is intended for the calibration and revision of a MOSAIQ6 or H30 series field strength meter*.

The measuring device is adjusted by a team of qualified professionals in the Televes factory itself according to the measurement requirements of the customer. In this way, it is guaranteed that the meter makes power measurements reliably and accurately.

With this service, the device is returned with the attached certificate that the calibration has been carried out satisfactorily.

*It is strongly recommended to perform the calibration every year for the proper functioning of the spectrum analyzer.
