

"Pack" Tower

A single structure for multiple antennas
Structural support for antennas designed for a simple and easy mount. Transport, handling and storage are optimized thanks to the product presentation in three layers with mast included.

This tower is an outstanding solution for single dwelling units or for commercial environments as a display support for exhibitions.

Ref.	306501
Logical ref.	TPK
EAN13	8424450174227

Other features

Colour	Orange
Finishing	Hot-Dip Galvanizing

Packing

Box	1 Units
------------	---------

Physical data

Net weight	15,689.00 g
Gross weight	15,689.00 g
Width	417.00 mm
Height	2,200.00 mm
Depth	363.00 mm
Main product weight	15,689.00 g

Highlights

- Can be directly bolted to the ground: installation does not require any ground works
- Long service life: Made of galvanised steel and cover with electrostatic polyester powder treatment ensure over 15 years corrosion protection. Furthermore, it includes stainless steel

screws

- Attractive design: an aesthetic solution for rigs with multiple antennas
- Compact packing saves storage space and makes it easier to transport

Main features

- Versatile: Enough space for mounting multiple antennas, which can be installed either on the mast included or by means of "L" supports (ref. 7349)
- Optimised installation: cable wiring is hidden inside the tower, which contributes to the TV installation quality and durability
- Plug and play: complete kit including all the accessories required for its assembly

Technical specifications

Reference		306501
Mast thickness	mm	2
Lateral panels thickness		1,5
Mast diameter		45
Mast total height		1.170
Mast operative height		1.040
Weight	kg	17
Bending moment of the base	Nm	1040
Bending moment of the mast		520
