

Option Extended Terrestrial Input to 120dBµV H30FLEX / H30Evolution / H30Crystal meter

This option can be installed in the H30 series of handheld meters to extend the input level range in the terrestrial band. Thanks to this function, it is possible to expand the terrestrial spectrum up to 120dBµV.

This option can be obtained for free if the user completes the H30 handheld meter registration process within 30 days of purchase.

Ref.	593235
Logical ref.	H30UP-120
EAN13	8424450186824

Packaging info

Unit	1 pcs.
