

Option IPTV Analyzer H30Evolution / H30Crystal / H30+ & H30D+ meter

Allows the demodulation and analysis of IPTV streams (both Unicast and Multicast), not only through video display but also by displaying the total bitrate and bitrate for each service. The relevant information for each service is already given: SID, VPID, AID, video profile, bit rate for both audio and video.

In addition, this option completes the RF measurements since all this information by service is analysed as well for this type of signals.

For IPTV signals, specific protocol measurements (UDP/RTP) are also analysed, such as UDP format, Media Loss Rate, Lost IP frames.

Ref.	593251
Logical ref.	H30EUP-IPTV
EAN13	8424450207673

Packing

Unit	1 pcs.
