

Panel for Rack 19" 1RU, with 24 "RJ45" Cat 6A FTP Female connectors

Set consisting of a panel and 24 female RJ45 connectors, for installation in a 19" rack (1U) and interconnection of the cabling.

It allows to have a fixed data distribution and to replace the signal with a simple reconnection on the panel.

It includes a support for the cable, that reduces the traction that the weight of the cable exerts on the connectors and the probability of disconnection when handling them.

This bracket provides additional security by leaving the connectors flush against the panel, protecting them from impact.

It offers versatility as it can be used with only the required connectors or with other connections. It is compatible with other types of adapters, for example: for coaxial cable (ref. 546620) and also with keystone modules for fibre optics (ref. 233230 and 233231).

In addition, its ground connection can be made on any point of the metal structure.

Ref.	533188
Logical ref.	UFBCAT6AB-S
EAN13	8424450321560

Packaging info

Box	1 pcs.
------------	--------

Physical data

Net weight	1,120.00 g
-------------------	------------

Gross volume	3.25 dm ³
---------------------	----------------------

Gross weight	1,310.00 g
---------------------	------------

Width	483.00 mm
--------------	-----------

Height	44.00 mm
---------------	----------

Depth	92.00 mm

Main product weight	640.00 g
----------------------------	----------

Highlights

- Although RJ45 connectors are included, the connections can also be used for coaxial adapters, keystones or left them empty
- Identification of each connector by laser engraved numbering
- Includes blank areas for annotations
- The tray ensures an adequate bending radius in the cable, without which connection faults and damage could occur
- To avoid damage, the ground connection (included) can be made at any point on the metal structure, which offers 100% effectiveness as it has a double panel socket without paint coating
- Designed to occupy 1U
- Includes 4 screws, 4 nuts, 4 washers, 2 Velcro ties and 24 cable ties for 19" rack installation
- Colour black (RAL 9005)

Discover

What is the RJ45?

The RJ45 is a connector commonly used in structured cable networks. With up to 8 connection pins, it is adequate both for data networks (8 pairs), as well as telephone networks (2 pairs). It is usually used in

networks compliant with standards TIA/EIA-568-B.
