

Replacement for 42RU Rack Double Perforated Steel Door

Perforated double door with honeycomb structure designed for 42RU high 19" racks.

Its construction allows air to circulate freely, helping to keep equipment in optimal temperature conditions. In addition, the perforated design reduces the weight of the door, making it easier to handle, transport and install.

The steel structure provides great strength and durability, guaranteeing the protection of the installed equipment. The door is reversible and removable by means of a flexible snap-fit, allowing it to be adapted to different configurations and easily removed when full access to the inside of the rack is required.

It includes a professional key lock for additional security.

Its design is particularly suitable for installations with limited opening space, providing convenient and secure access even in compact environments.

Ref.	995301
EAN13	8424450333013

Packaging info

Box	1 pcs.
------------	--------

Physical data

Net weight	13,000.00 g
Gross volume	75.00 dm ³

Gross weight	14,000.00 g
Width	805.00 mm
Height	1,885.00 mm
Depth	20.00 mm
Main product weight	13,000.00 g

Highlights

- High strength and durability: made of steel and coated with polyester resins and lead-free pigments.
- Convenience: double design reduces opening space requirements
- High ventilation: perforated construction with honeycomb structure keeps equipment at optimum temperature
- Lightweight: optimised design for easy handling, transport and installation
- Reversible and removable: can be adapted to different configurations and removed easily

Technical specifications : Ref. 995301

Modular spacing (standard)	in	19
Height	in	74.213
Width	in	31.693
Depth	in	0.787
Number of rack units (RU)		42
Material		Steel
Color		Black
Surface finishing		Electrostatic powder
Number of doors		2
Grounding		Yes
Protection index (IP)		20
