

Set of 100 clip-on number markers for cables Ø 6.0–7.5 mm

Clip-on number markers designed for the quick and organised identification of cables with diameters between Ø6.0 and 7.5 mm. Their colour coding and visible numbering make cable identification easier, optimising installation, maintenance and organisation tasks.

Made from polyoxymethylene, they offer high mechanical strength and resistance to deformation, ensuring excellent durability. The numbering is engraved in low relief, preventing wear and ensuring permanent identification throughout their service life.

They feature a clip fastening system that enables quick and secure installation, even after the cabling has been completed, without the need to disconnect any connections.

Ideal for fibre optic, data, coaxial and electrical cable installations within the Ø6.0–7.5 mm diameter range.

Ref.	200103
Logical ref.	C675MARK
EAN13	8424450335413

Packaging info

Blister	1 pcs.

Physical data

Net weight	28.00 g
-------------------	---------

Gross volume	0.16 dm ³
Gross weight	28.00 g
Width	10.00 mm
Height	12.00 mm
Depth	5.00 mm
Main product weight	1.00 g

Highlights

- Made from high-strength polyoxymethylene, offering excellent resistance to wear and deformation
- Compatible with cables from Ø6.0–7.5 mm, designed for the precise identification of fibre optic, data, coaxial and electrical cabling
- Number markers from 0 to 9 in different colours, with 10 of each number, enabling quick and visual cable identification
- Quick and easy installation without the need to disconnect the cabling, allowing them to be fitted even after the installation has been completed
- Especially recommended for installations in racks and telecommunications cabinets with high cable density
