UPDATE
H30FLEX

Update

There are two ways of updating the firmware of an H30FLEX meter:

Option 1

By using H30FLEX's web application:

1. Download the update file from the Televés website and save it into your computer;
(http://en.televes.com/h30flexdownload)
2. Follow the steps indicated in the manual;
(http://files.televes.com/h30flex/User_manual_V004.pdf)

Option 2

By using the USB storage function from the **Setup menu**:

1. Download the update file from the Televés website and save it into your computer;
(http://en.televes.com/h30flexdownload)
2. Switch on the H30FLEX.
3. Click on the **Home** button to go to the **Main menu**.
4. Click on **Setup**.
5. Select **USB storage**.
6. Turn USB storage **ON**.
7. Connect the H30FLEX to the computer using the USB port.
8. Then, you need to look for the unit called H30FLEX in the computer, and open the folder, so you'll see a folder called **updates**.
9. Double-click on the downloaded update file to decompress it. You will see two files. (**updater** and **version**)
10. Copy the two files for the update (**updater** and **version**) into the **Updates** folder in the H30FLEX unit.
11. Eject the H30FLEX unit in your computer.
12. In the setup menu → **USB storage,** select **OFF.**
13. In the setup menu → **Firmware update,** press **OK** to confirm.
14. A message will display, indicating the H30FLEX is being updated. Wait for H30FLEX to turn off.
