

## Tekniska specifikationer : Ref. 768538

|                                                   |     |                                                    |
|---------------------------------------------------|-----|----------------------------------------------------|
| Number of 2.5 Gigabit Ethernet ports (2.5GBASE-T) |     | 1                                                  |
| WiFi standard                                     |     | 802.11 a/b/g/n/ac/ax (4x4) 2.4/5 GHz               |
| 2.4GHz Channel bandwidth                          |     | 20MHz / 40MHz                                      |
| 5GHz Channel bandwidth                            |     | 20MHz / 40MHz / 80MHz                              |
| OFDM Modulations                                  |     | 1024-QAM / 16-QAM / 256-QAM / 64-QAM / BPSK / QPSK |
| Number of WiFi antennas                           |     | 8                                                  |
| 2.4GHz Antenna gain                               | dBi | 5                                                  |
| 5GHz Antenna gain                                 | dBi | 5                                                  |
| Powering                                          | Vdc | 12                                                 |
| PoE input                                         |     | Yes                                                |
| Max. output current                               | A   | 2                                                  |
| Max. power                                        | W   | 17                                                 |
| Operating temperature                             | °C  | 0 ... 40                                           |
| Relative humidity                                 | %   | 0 ... 90                                           |
